ANNEX 2

Blue Economy Subsectors and Related Activities

24/02/2021

A non-exhaustive and non-exclusive list of relevant areas for the blue economy includes:

- **The blue bioeconomy** — the cultivation, husbandry or capture of living material from fresh or saltwater and activities based on the use or processing of this material
- **Digital transformation** of ocean and coastal activities
- **Renewable energy** — including energy from wind, sun (floating), tide, wave and thermal gradients; logistic or supporting activities in that area are covered
- **Enabling technologies** such as sensors, corrosion or biofouling resistant materials or coating, digitisation, electricity transmission equipment, multi-purpose platforms
- **Production of new products** from living or non-living resources that would otherwise be wasted
- **Cleaner shipping**
- **Pollution monitoring, clean-up or management**
- **New facilities** that support the diversification or energy efficiency of ports
- **Sustainable tourism** aiming at reducing its carbon footprint or enhancing biodiversity, or efficiently managing resources (e.g. water, food and waste) or tourist flows (e.g. diversifying offer, addressing seasonality and safety)
